- 1) It would be beneficial to mention Bloom's level for each question in the Question paper itself.
- 2) It would be good to have CO (course outcomes) mapping for each question.
- 3) In the scheme rather than writing "Explanation marks", give a reference solution. There may be multiple solutions, but a reference solution should be provided.
- 4) The diagram should be ~~mentioned~~ written in the scheme.
- 5) In Question 7/B a brief description should be provided rather than just mentioning the problem.

Remarks (if any):- 1) AICTE has specified for theory SEE that at max you can go upto 4th level of Bloom's taxonomy. But having Bloom's upto 5th level defeats the purpose of continuous education. Not every student will be able to answer questions which are marked upto 5th level of BT. Dr. Govind Charkar, S. Professor & Dean (EEE) Dept. of CEE, Dr. Ambedkar Institute of Technology, Bengaluru. Name and address of the Auditor

2) Typo in 5) a) => function.

P.T.O.

3) Most of the diagrams are not clearly visible.

4) While pasting the diagrams from the textbook, even the figure number is copied which seems unprofessional. Since the schema is given to students, we have to maintain high standards while preparing schema.

For example in Question 2)a) the figure title is Figure 2.2. TCP three-way handshake. Now is the word 'Figure 2.2' is relevant in the schema?

A 5) ~~Ques~~ There is no division of marks for the Questions in the schema.

6) At least a brief description for each of the diagram should be provided.

For the Dept. of CEE & ISE.

- 1) Subdivision of marks should be provided.
- 2) BT level to 5 should be avoided.
- 3) Diagrams should be visible.
- 4) Explanation for diagrams should be provided.
- 5) Ensure the questions can be answered by the students within the given time

10/05/2022.
(Dr. Suresh Chandra)

Electronics & Communication

- 1) Question papers are well designed, however in one subject the questions were not clear. (18EE52)
- 2) Scheme was not complete for the above said ^(18EE52) question paper. However the process is in-place and implemented
- 3) BT & CO mapping are to be ~~taken~~ looked into carefully.

Remarks (if any):-

Questions are properly mapped to COs, but all COs have not been covered. Bloom's taxonomy levels for a few questions are not properly mapped. For this course, the max level that can be achieved is only three. This course really does not require numerical problems. Marks provided by valuator is not strictly as per the scheme and solution for a few questions.

Report

I have audited the course "Engineering Mathematics-II" "18MA31C" for the odd sem 2021-22. The question paper is set as per the syllabus with due weightage to all the units in terms of marks, CO and BT.

However, the Question No. 1 (i.e. Part-A) may be extended to other units as well than units - 1 and 2.

It will be a good practice to include the CO and BT in the SEE question paper. The evaluation and moderation are done as per the procedure. The evaluation is fairly good. Overall process is satisfactory.

The Examination process followed at RVCE is systematic, with well defined procedures, support documents and method of implementation in place.

The process is well coordinated and guided.

The documentation is well maintained.

However there are few observations that can be made

- there are 5 units in each course but only 4 COs, mapping becomes difficult and sometimes by oversight the 4th CO is not mapped at all to any of the questions.
- QP setting is average with many paper setters having lack of knowledge about BT level and hence do not map the level properly with the questions
- In PH courses the valuation is more liberal as there is a mismatch between the answer expected and the answer written by the student.
